EDUCATION

University of Delaware

Bachelor of Science in Honors Computer Science, Cybersecurity Focus. Minor in Mathematics and Data Science, Cybersecurity, and Statistics. GPA: 3.8.

Newark, DE
May 2028

EXPERIENCE

VP of Academic Excellence

Feb. 2025 – Feb. 2026

Delta Upsilon, Delaware Chapter

Newark, DE

- Led academic initiatives including a peer study program, structured study hours, and exam preparation strategy sessions, resulting in a ~4.9% increase in cumulative GPA (2.884 to 3.024) and a ~29% increase in Dean's List recipients within one semester.
- Redesigned Microsoft Excel and Word workflows to streamline academic tracking, data collection, reporting, and record management, creating a sustainable system for future executive board members.

PROJECTS

DDOL Youth Workforce Connect

Aug. 2026 – Aug. 2026

Hackathon Winner

- Developed a React/TypeScript frontend with FullCalendar and an Express/Node.js REST API, implementing public event discovery, category/cost filtering, organization management, and a human-in-the-loop event moderation console.
- Engineered a serverless AWS data pipeline using Lambda and DynamoDB to fan out scraping jobs across partner organizations with bounded concurrency, automatic retries, and per-organization fault isolation.
- Built a Python web-scraping and AI extraction pipeline using Requests, BeautifulSoup, and Amazon Bedrock to discover event pages and transform unstructured website content into structured event data for moderation.

UD Dataquest

May 2026 – May 2026

Winner

- Analyzed Delaware's Department of Education dataset to identify factors contributing to above-average teacher turnover across school districts.
- Developed a predictive machine learning model ($R^2 = 0.919$) that identified the three primary drivers of turnover.
- Built a data-driven salary investment model that produced evidence-based policy recommendations.

Drafter Website Builder

Apr. 2026 – Jul. 2026

- Built features including page routing, live code generation, project import/export, and project graphs using React, TypeScript, Dexie.js, Jest, and Cypress.
- Collaborated in a 3-member Scrum team over 3 Agile sprints, using version control, participating in sprint planning sessions and commit code reviews, and integrating feedback to deliver project milestones on schedule.
- Presented project demonstrations to an audience of 30+ classmates and instructors every two weeks, communicating technical progress and design decisions while responding to questions and incorporating stakeholder feedback.

Superhero Mod

Jul. 2019 – Present

- Developed a Minecraft mod featuring custom superhero-themed gameplay and mechanics using Java and Gradle.
- Published the mod across multiple platforms, reaching 120K+ downloads and building a large Discord community.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C/C++, C#, HTML, CSS, Kotlin, Bash, SQL

Frameworks: React, Django, Flask, Node.js, Express.js

Developer Tools: Git, Docker, Visual Studio Code, JetBrains IDEs, Microsoft Office, ESLint, JIRA, SCRUM

Libraries: React Router, Zod, Lucid React, React Icons, Motion, Pandas, NumPy, Socket.io
